

Maximizing uptime on your Coca-Cola Freestyle dispenser
Cleaning Cartridge Slots

To keep your dispenser running smoothly, crew members should pay special attention to wiping down cartridge slots avoiding build up of syrup, dust, and other residue.

Follow these simple steps **every time you change a cartridge** to reduce potential service calls, maximize your dispenser's uptime, and limit product waste.

1

Prepare a bucket approved sanitizer solution such as Kay-5 Sanitizer.

2

Attach a clean microfiber sleeve onto the cartridge slot brush. Dip into sanitizer and ring excess liquid. Then clean the cartridge slot deck.

3

With a clean cloth, dipped in sanitizer solution, clean the cartridge probes. Repeat these steps until both the cartridge probes and deck are clean and dry. Make sure probes have not accumulated any foil build-up from packages because this can lead to greater leaking.

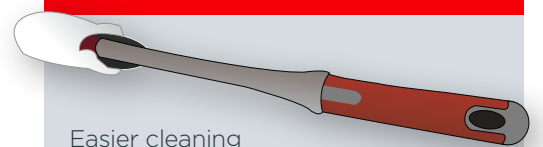

Don't Forget!

When replacing the cartridges after cleaning:

1. Ensure cartridges are positioned properly in slot
2. Keep the cartridge door on

NEW! Cartridge Slot Cleaning Tool

Easier cleaning for those hard to reach spaces in the cartridge slot!

Don't Forget!

Order small parts including the new cartridge slot cleaning tool and microfiber cartridge sleeves by calling **1-800-241-COKE**

cartridge slot cleaning tool #149324

microfiber cartridge sleeve #149325

Kay-5 Sanitizer #24041

microfiber cloth #127723

Helpful Hints!

Accessing Ingredient Cartridges

Did you know there are 3 ways to open the dispenser door:

- 1) Secret handshake
- 2) Hidden lock or pinhole access (depending on model)
- 3) Scan a cartridge
