

### Keeping drains flowing

## Troubleshoot a Clogged Drain

- 1 Remove any trash, then remove the drain spider.

- 2 Press the drain plunger into the mouth of the drain, then push the plunger rod firmly to force air down the pipe to clear the clog.

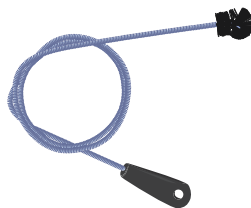

### PREVENTATIVE MAINTENANCE ROUTINE, DAILY CLEANING

Follow this cleaning routine daily to prevent drain clogs.

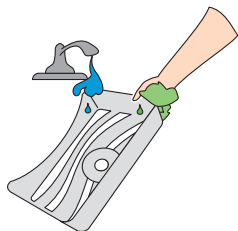

- 1 Prepare an approved sanitizer mix.

- 3 Using the **long drain brush**, thoroughly scrub inside the dispenser drain.

- 2 Carefully remove the cup rest, drip tray, and drain spider. **Thoroughly sanitize** each.

- 4 **Pour remaining sanitizer** mix slowly down the drain, then replace the spider and cup rest.
