

# Cleaning and Handling BIBs

Proper storage and handling of BIBs is crucial to keep drinks flowing.

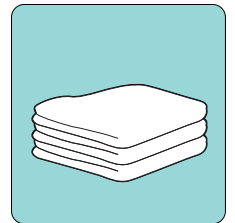

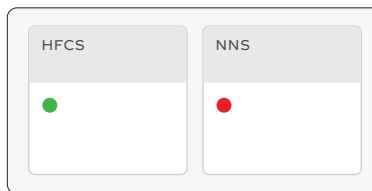

## MANAGING YOUR INVENTORY

- Manage inventory by using the oldest sweetener box first. Check the label for date.
- Proper storage at comfortable room temperature helps ensure quality beverages.
- When storing BIBs, keep the arrow on the box pointing up.

## CHECKING SWEETENER

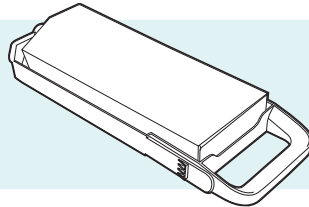

- Check the remaining sweetener each day. The green dot will change to a red dot when sweetener is gone.
- All full calorie brands grayed out? Check your HFCS levels. All low/no cal brands grayed out? Check your NNS levels!

Kay-5 Sanitizer®  
#24041

Microfiber Cloth  
#127723

★ For 7000 and 7100, NNS may be a BIB under the counter, or it may be a cartridge that is placed like other ingredient cartridges. If so, they will always be in the number one (1) or top slot in the cartridge shelf.

## REPLACING HFCS AND NNS BIB

**1** Double check to see how much product is left by lifting the box.

**2** Use a cloth to catch any spills, and turn connector counter-clockwise to loosen.

**3** Remove connector and replace with new HFCS sweetener BIB.

**NOTE:** Always check product is within the **Enjoy By Date**.

**4** Scrub using the blunt end of the nozzle brush and soak in approved sanitizer solution.

Wait two minutes, repeat with clean sanitizer and air dry.

**5** Open the box and pull out the fitment.

**CAUTION:** DO NOT use a sharp object to open.

**6** Attach the connector to the fitment and turn clockwise to tighten.

**Helpful hints:**  
Understanding HFCS and NNS

### HFCS (High Fructose Corn Sweetener)

- Used for all full-calorie beverages
- HFCS comes in 5.0 gal BIB (same size as current BIB) and is identical to changing other BIB syrup boxes
- HFCS shelf life - 120 days

### NNS (Non-Nutritive Sweetener)

- NNS comes in 2.5 gal BIB (same size as current 2.5 gal BIB) or as a cartridge
- NNS BIB shelf Life - 75 days
