

FOUNTAIN CARBON DIOXIDE INGREDIENT QUALITY

Beverage-Grade Carbon Dioxide for use in The Coca-Cola Company's Carbonated Soft Drinks

Bubbles! Fizz! Sparkle!

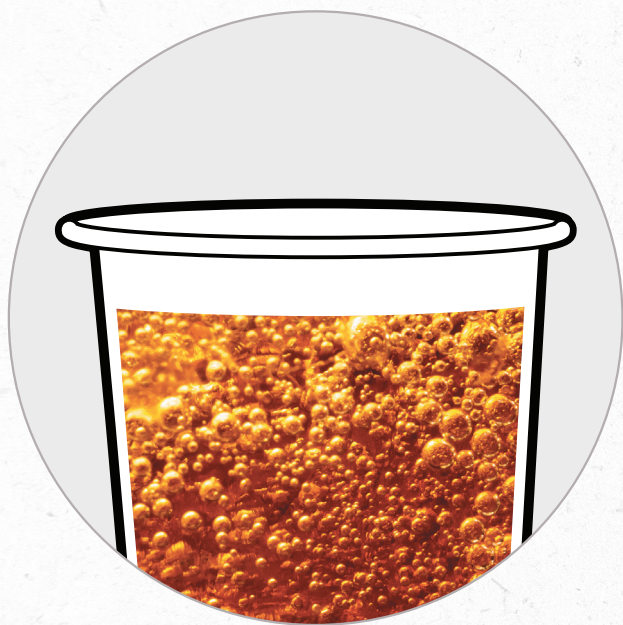

Carbonated beverages are most refreshing when they have the right type of Carbon Dioxide (CO₂) as a key ingredient and the right level of carbonation.

There are different grades of Carbon Dioxide that are commercially available. Carbon Dioxide characterized as **Beverage-Grade** is of the highest purity, safety, and quality of all grades available.

Beverage-Grade carbon dioxide is the only grade approved for The Coca-Cola Company's carbonated beverages.

CO ₂ Grades				
	Welding	Hospital	Food	Beverage
	Do not use	Do not use	Do not use	Only use Beverage-Grade CO ₂

Starting with the right safety and quality of ingredients, including carbon dioxide, is essential to dispensing high quality and safe fountain beverages.
